The shape of your ideas

The sustainable quality of HIMACS

Solid Surface Material

Translucent wall with
backlit pattern, made in
HIMACS, Pavia.

Quality is thinking about tomorrow today.

Sustainable construction is an essential part of design around the world today. The demand for environmentally friendly and healthy building materials is rising accordingly.

LX Hausys makes continuous efforts to provide a sustainable valuechain, which meets the highest ecological standards. HIMACS durability, combined with its intrinsic properties, means that any off-cuts can be utilized elsewhere, thus allowing for any fabrication using HIMACS to contribute virtually no waste to landfill. Numerous international certificates award HIMACS top marks for its hygienic performance and high standards of indoor air quality, due to its classification as an emission-free product. The company also provides environmental product verifications and international certifications which can contribute to green building projects.

HIMACS Solid Surface pre-consumer waste is recycled into new products, minimising landfill. A selection of colours contain up to 16% recycled material and are certified by the Scientific Certification Systems (SCS) for stated recycled content. All HIMACS products are manufactured in accordance with the environmental standard ISO 14001. What's more, the company undergoes regular environmental and energy consumption analyses and publishes the results. It incorporates them in its sustainability strategy and takes them into consideration when formulating its reduction targets.

The ISO 14000 family concerns the management of environmental quality. The most popular certificate in this group is ISO 14001. It encourages the minimisation of damage caused by our own activity to the environment and the continuous improvement of environmental performance. The objective is to contribute to protecting and stabilising our planet's environment. This test certifies that the environment management system of HIMACS conforms to ISO 14001 standards.

Amazing that
something so
great is actually
so simple

= **HIMACS**

Just three ingredients are
used to enable the endless
possibilities of HIMACS:
Yes, it's as simple as that.

Pharmacy Domenech

Location: Valencia, Spain

Design: Inside Pharmacy & A4 Studio, Spain, inside-pharmacy.com

Fabrication: Inside Pharmacy, Spain, inside-pharmacy.com

Material: HIMACS, Alpine White

Healthy indoor air guaranteed

Material safety

- HIMACS has no VOC emissions* and is formaldehyde free.
- HIMACS is free from nanoparticles.
- HIMACS comes in well below the minimum occupational health and safety LCI** levels.
- HIMACS is Silica free
- Renowned institutes confirm that the material provides a high indoor air quality.

Free of emissions

Extensive studies – within LX Hausys' own laboratories as well as tests carried out by other renowned independent institutions – have shown that the HIMACS material itself, as well as the cured adhesive, are **completely free from formaldehyde and emissions**.

Free of nanoparticles

While the benefits of nanotechnology are widely publicised, the discussion of the potential ill-effect of their use in consumer and industrial products is beginning to emerge. Prolonged exposure to nanoparticles can have an adverse affect on human health and the environment. **HIMACS is totally free of nanoparticles, making it the safe choice for industry today.**

HIMACS has been awarded the Greenguard Gold Indoor Air Quality Certificate. Emission testing under EN ISO 16000-9 also indicated that there were no traces of harmful substances.

*Volatile organic compounds

** Lowest Concentration of Interest (LCI value): LCI value = a benchmark for the health-related evaluation of building product emissions

*** HIMACS: Solids, Lucent, Sand & Pearl, Granite, Sparkle, Lucia, Marmo and Aster.

HIMACS holds the following certifications:

Greenguard certification guarantees that products for indoor use do not exceed the upper limits for chemical emissions.

The Environmental Product Declaration (EPD) marks and documents the ecological assessment of the entire life cycle of a product.

The Finnish M1 classification presents emission requirements for building materials used in office and residential buildings with respect to good indoor air quality***.

Behind the facade lies an extremely positive eco-balance.

Manufacture and transport

- HIMACS is manufactured in an energy-efficient process that is economical with its use of resources.
- The plants in Korea and the USA meet all local and international standards.
- The material is transported from the USA to Europe exclusively by ship. LX Hausys selects its freight forwarders very carefully and makes sure all of them have a clear environmental standard engagement.

The production of this solid surface material is marked by an excellent energy balance. In recent years, the company has been very successful in achieving ambitious goals in terms of waste reduction and water conservation. In addition, HIMACS plants in Cheongju (Korea) and Atlanta (USA) meet all environmental standards.

In terms of logistics, overseas transport takes place wherever possible by ship. Within Europe, LX Hausys observes the Euro-5 standards for reduced particulate emissions. The partner-network of LX Hausys Europe consists of carefully selected partners with the highest environmental standards: for example, the State-of-the-Art logistics centre in the Netherlands is one of the first buildings to have been constructed in accordance with the WELL Building Standards and awarded the BREEAM Certificate. This means that it meets the highest requirements for environmentally friendly and healthy construction.

Les Olivades Marrakech

Location: Marakesh, Morocco

Design: Gérard Iffrig, France

Fabrication: Plan Design, Morocco

Material: HIMACS, Alpine White

The benefits flow together seamlessly.

Processing

- Since HIMACS can be seamlessly joined, any off-cuts can be used in other projects, meaning there is virtually no wastage of the material
- HIMACS installations are extremely strong and durable, with a limited warranty of 15 years.
- It's long-life cycle means reduced waste over the years as a result.

As durable as stone, more flexible than wood – and available in around 100 colours: HIMACS facilitates a visually seamless production and can be machined in virtually any way. Any off-cuts can be reused for new projects. Plus, HIMACS installations are extremely durable and retain their original condition for a long time with very little repair required. As a result, there is very little waste. Additionally, products that last a long time do not need to be replaced, which saves resources and energy and has a positive effect on the eco-balance.

Ecological quality: tested, certified and awarded.

The most important product verifications, classifications and certificates.

DGNB

• German Sustainable Building Council (DGNB)

HIMACS has achieved quality level 4 of 4 – the best rating – for the local environmental impact of the overall product (2018). The DGNB system is a holistic and unique certification system for sustainable construction.

BREEAM[®] delivered by bre

• Building Research Establishment Environmental Assessment Method (BREEAM)

Among other ratings, the material complies with “Hea 02 Indoor Air Quality” for particularly good air quality. BREEAM is one of the world’s most important global rating methods for sustainable architecture.

• Leadership in Energy and Environmental Design (LEED)

Is a standard voluntary system to certify high performance of buildings, from the US Green Building Council (USGBC). LEED certifies buildings using a credit system. Architects and planners using HIMACS for their project can claim EQ Credit for Low-Emitting Materials with the category Indoor Environmental Quality (EQ).

• Environmental Building Certificate – Grade “outstanding”

The Korean Air Cleaning Association certifies that HIMACS complies with the Korean regulations for environmental building materials.

• Environmental Product Declaration (EPD)

An environmental product declaration (EPD) reports the lifecycle assessment of a product in a single, comprehensive report, which is verified by UL Solutions against the international ISO 14025 standard. The HIMACS EPD provides information to buyers about a product’s impact on the environment, such as global warming potential, smog creation, ozone depletion and water pollution.

• SKArating Product Compliant Label Certificate

SKArating is an environmental benchmarking and assessment scheme for non-domestic fit outs, that helps organisations prioritise sustainability in a measurable way. As part of the SKArating scheme they introduced a product and material compliance scheme, the SKArating Compliant Product Label. The label helps manufacturers, suppliers, specifiers, and their clients quickly and easily find products that meet individual SKArating criteria. Whether it is construction products, finishes, building services products, or furniture and fittings, seeing the label instantly confirms a product’s compliance with SKArating.

Goals

- Reduce the ratio of fossil fuel energy use, by increasing the use of renewable energy.
- Introduce co-generation and photovoltaic energy to increase the ratio of renewable energy.
- Establish sustainable partnerships to reduce the GHG emissions and the energy use.

Committed sustainably.

Activities and Awards of LX Hausys

- LX Hausys does not produce any ozone-depleting substances as defined in the Montreal Protocol nor does it use harmful substances in the manufacturing process of HIMACS.
- LX Hausys is subject to the GHG emissions trading scheme, and endeavours to reduce the GHG emissions in multiple ways, including the adoption of renewable energy and external heat sources.
- LX Hausys voluntarily subjects its products to regular environmental audits and energy consumption analyses and systematically publishes the results in its "LX Hausys Sustainability Report".

Promoting joint growth through green partnerships

LX Hausys has supported improvement activities since 2015 to reduce greenhouse gas emissions and energy costs by minimizing and removing risk factors related to carbon emissions by the production activities of suppliers using "Conglomerate/Small and Medium-sized Business Energy Accompanying Project" and drawn up plans for reasonable energy utilization.

Winner of the CDP Award 2012

The CDP (Carbon Disclosure Project) is an organization which collects the environmental data of companies, cities and countries once a year on a voluntary basis and awards the results of the sustainability assessments. Beside of this award LX Hausys received 2017 honours in the Carbon Management Sector ("industrial materials" category).

**High impact in
aesthetics, yet
low-impact in
environmental cost.**

Explore sustainable design with HIMACS Recycled Colours

- HIMACS recycled colours are durable, colourfast, and easy to maintain. They offer the same outstanding properties and green credentials as our standard HIMACS, but in addition contains up to 16% of pre-consumer recycled material and are certified by the Scientific Certification Systems (SCS) for stated recycled content.
- HIMACS recycled colours are also GREENGUARD Certified for Indoor Air Quality
- HIMACS recycled colours can provide LEED® credits in sustainable design.

HIMACS Recycled colours

The use of HIMACS contributes toward satisfying EQ Credit for Low-Emitting Materials with the category Indoor Environmental Quality (IEQ).

Solids

Alpine White
S028E [12 mm]
Minimum 8% Recycled Content

Gravilla

Gravilla Snow
GM01 [12 mm]
Minimum 6% Recycled Content
Available from January 2025

Aurora

Aurora Grey
M608 [12 mm]
Minimum 6% Recycled Content

Lucia

Ice Queen
W001 [12 mm]
Minimum 8% Recycled Content

Shadow Queen
W003 [12 mm]
Minimum 6% Recycled Content

Volcanics

Gemini
VW01 [12 mm]
Minimum 14% Recycled Content

Tambora
VE01 [12 mm]
Minimum 16% Recycled Content

Santa Ana
VA01 [12 mm]
Minimum 13% Recycled Content

Obtain LEED eco-credits

- **Leadership in Energy and Environmental Design (LEED)** is a widely used, voluntary system for certifying the high performance of buildings from the US Green Building Council (USGBC). LEED certifies buildings using a credit system.

* Recycled content percentages listed under each colour.

- Contains SCS certified pre-consumer recycled content.
- Suitable for exterior use. Please check conditions about level of suitability and warranty per colour.
- As these are randomly veined colours, specific fabrication guidelines need to be followed. Ask your sales partner for more information or visit: [ixhausys.com/eu](https://www.ixhausys.com/eu).

HIMACS Recycled colours

Granite, Quartz, Sand and Pearl

Soon available
 Arctic Granite
 G034 [12 mm]
 Minimum 7% Recycled Content
 Available from January 2025

Now available
